

LEGAL OR LETHAL?

All You Should Know About New Psychoactive Substances (NPS)

What are NPS?

NPS contain ingredients that mimic the effects of controlled drugs. They have unknown and dangerous toxicology effects and are just as addictive and harmful as illegal drugs.

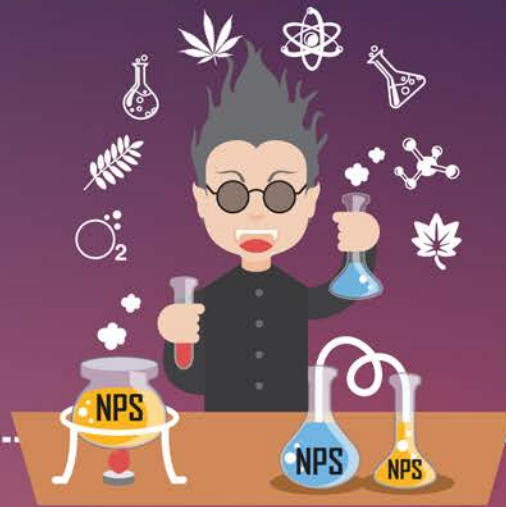

Over **100 NPS** listed as **Class A controlled drugs**

as of 1 May 2015

Designer danger

Marketed by terms such as "legal highs", "designer drugs", they often have fanciful names to attract youths:

- Spice
- Bath salts
- K2
- Kronic
- Bromo-dragonfly
- Herbal incense
- Aphrodisiac tea
- Party pills
- White magic
- Kit-Kat
- Vanilla sky
